2022 Nemadji Handicap Guide

Prepared by the Nemadji Men’s Club

Benefits of Using USGA Handicaps

1. Interleague compatibility
2. Less burden on league commissioners
3. Can be used for tournaments and other events
4. USGA Index is a better indicator of player's capability than using a few rounds
5. Universally accepted as the best way to gauge a player's handicap index

Let’s Get Started!

What is a Handicap Index?

- Your Handicap Index is a portable number that represents your demonstrated golfing ability. It is based on your past scores relative to the difficulty of the course and tees played, as well as the playing conditions during each one of those rounds.
- To calculate your Handicap Index, your 8 best Score Differentials from your most recent 20 scores are averaged, and additional safeguards are included that:
- Prevent excessive upward movement within one year (see **caps**), and
- Further reduce a Handicap Index after an *exceptional score* is posted (see **exceptional score reduction**).

Key Takeaway

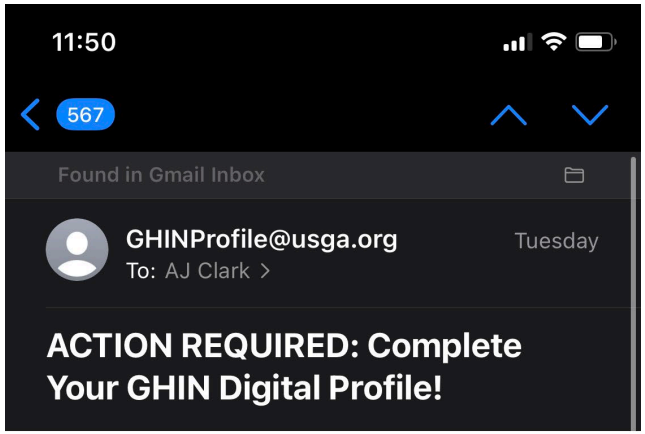
- A handicap index considers the difficulty of the course and even the tee box selected. It's based upon scores entered.
- A course handicap takes the handicap index and applies it to the course and teebox selected. It is used for competition, like golf league or a golf tournament.
- **Course Handicaps vary by tee box.**

Establishing a USGA Handicap Index

- Players must enter round scores into the USGA database.
- Scores should be entered for EVERY individual round played at any USGA course.
- Scores from scrambles should NOT be entered.

STEP 1 - Activate WSGA Account

Every member of the Men's club is given a USGA account. Members need to activate the account annually. To activate an account, contact the Nemadji Pro Shop @ 715-392-0266 or contact a Men's Club Representative.



USGA GHIN

Dear Allan,

Thank you for being part of the Golf Handicap Information Network (GHIN) through your club and golf association.

For the security and privacy of our golfers, we now require all golfers to setup an account with a password in order to access the GHIN Mobile App and ghin.com.

STEP 2 – Create a GHIN Profile

- This year WSGA began using the GHIN system! (This is good thing)
- You will need to create a profile using this email
- Need help/can't find email?

1. Try this link: https://www.ghin.com/profile
2. Or contact the WSGA info@wsga.org or 414-443-3460 tell them you need to create a profile.

STEP 3 – Prepare to Enter Scores

The best way to enter scores in through the GHIN app.

It can also be done on a desktop.
https://www.ghin.com/profile

If you have been entering scores on the WSGA app it's all good, they transfer over.

The GHIN app is better than the USGA app because is can calculate 9 hole course handicaps.

STEP 3 – Prepare to Enter Scores

The best way to enter scores in through the GHIN app.

It can also be done on a desktop.
https://www.ghin.com/profile

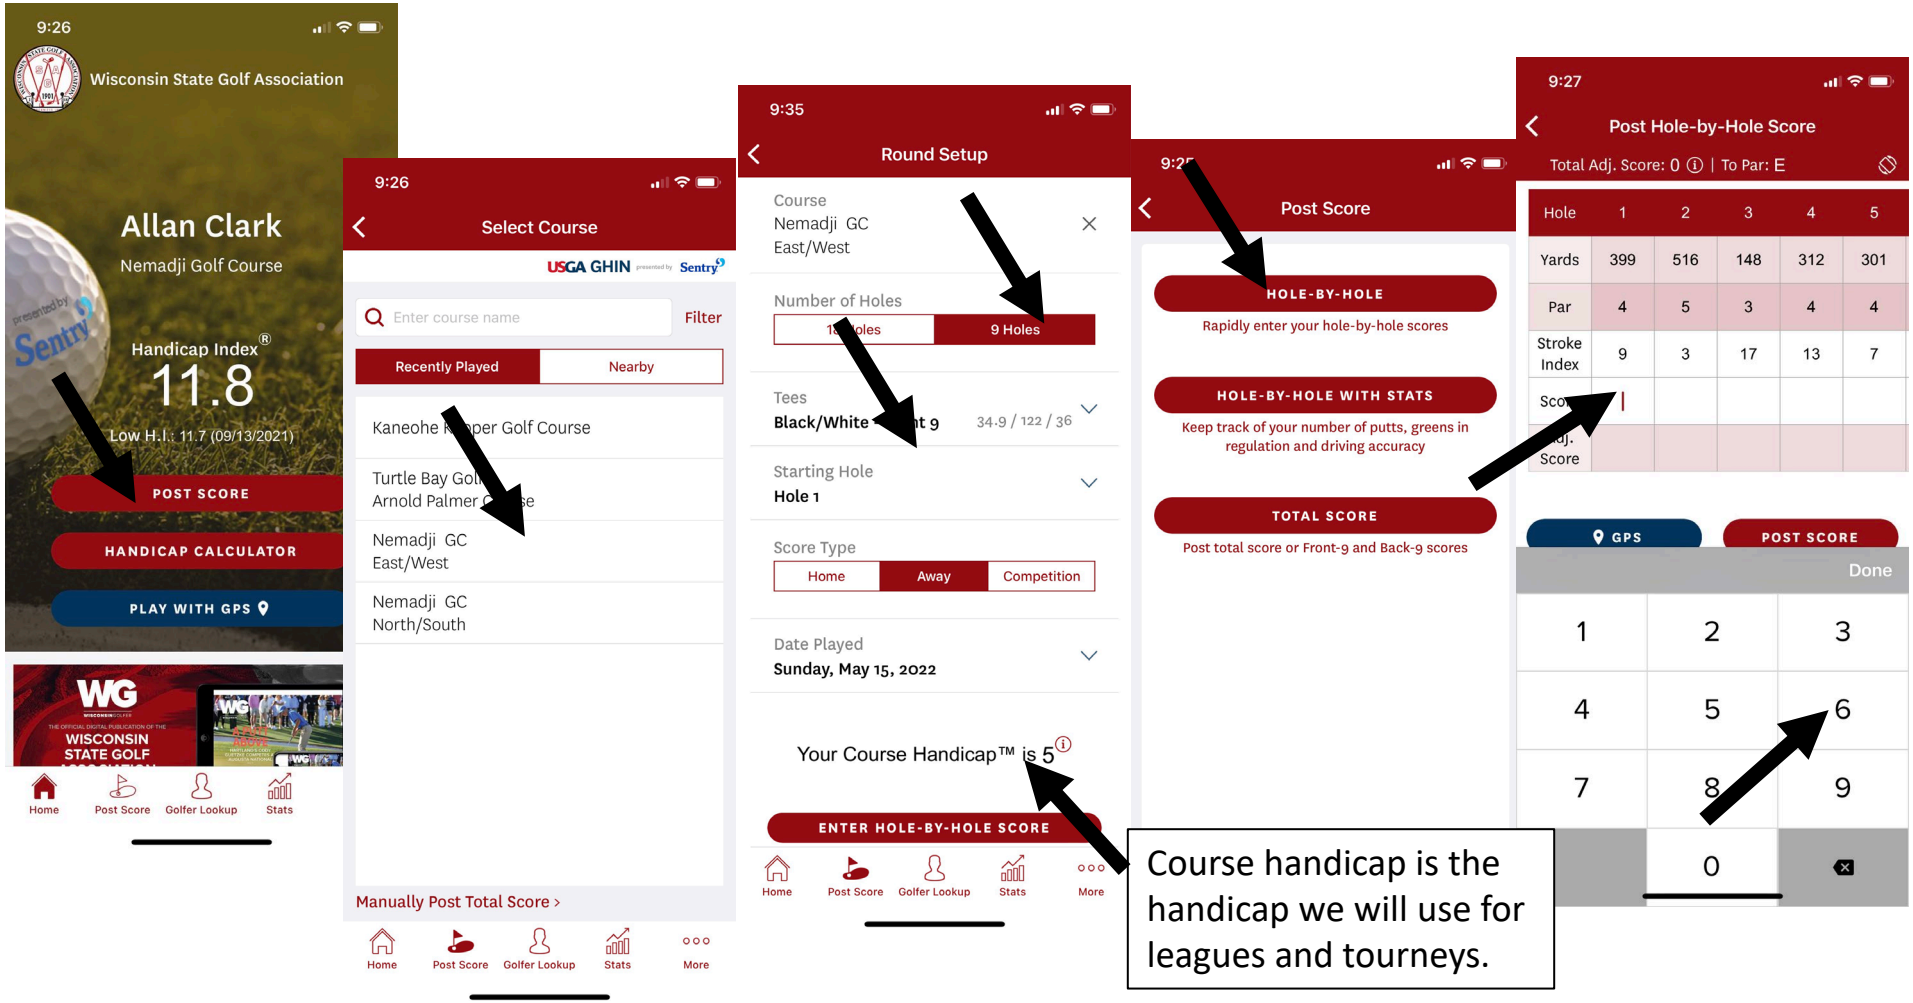
If you have been entering scores on the WSGA app it's all good, they transfer over.

The GHIN app is better than the USGA app because is can calculate 9 hole course handicaps.

STEP 4 – Entering Adjusted Scores

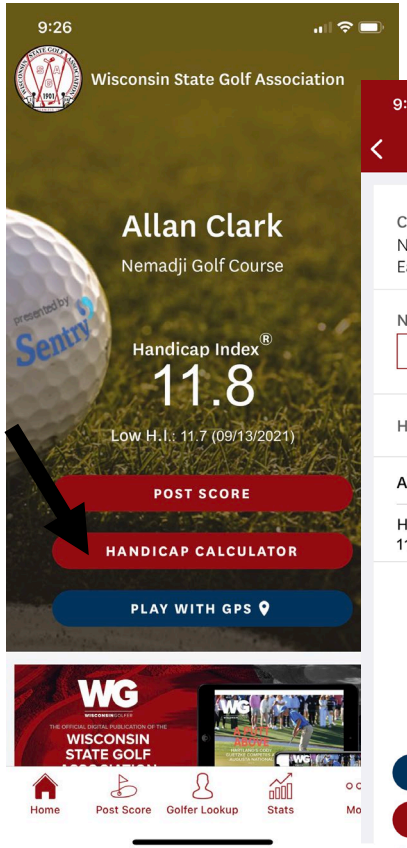
- The USGA adjusted score is fairly simple. The highest score that should be entered is a “net double bogey”
- A net double bogey is a double bogey counting your handicap.
- In simple terms if you are popping on a hole you can enter a triple bogey actual score, which is a net double bogey considering your handicap.
- EASY WAY!! ENTER GROSS SCORES HOLE BY HOLE IN GHIN APP. IT ADJUSTS FOR YOU!

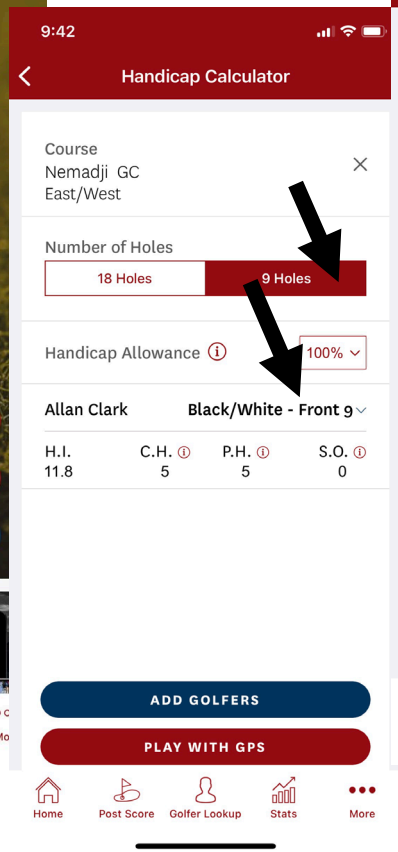
ENTERING SCORES IN GHIN APP

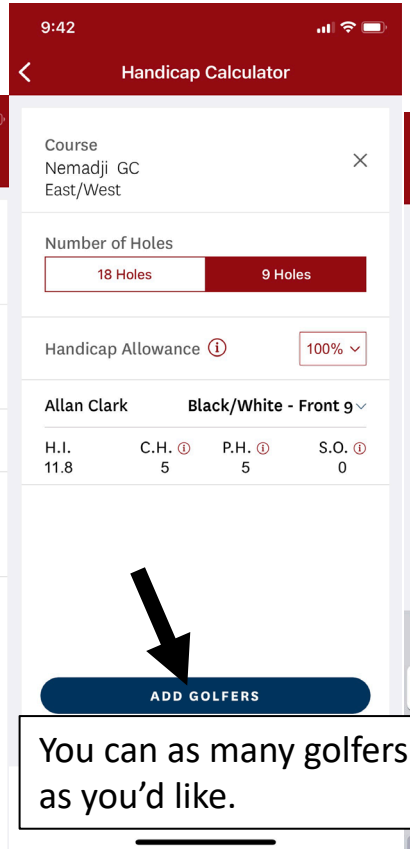


Course handicap is the handicap we will use for leagues and tourneys.

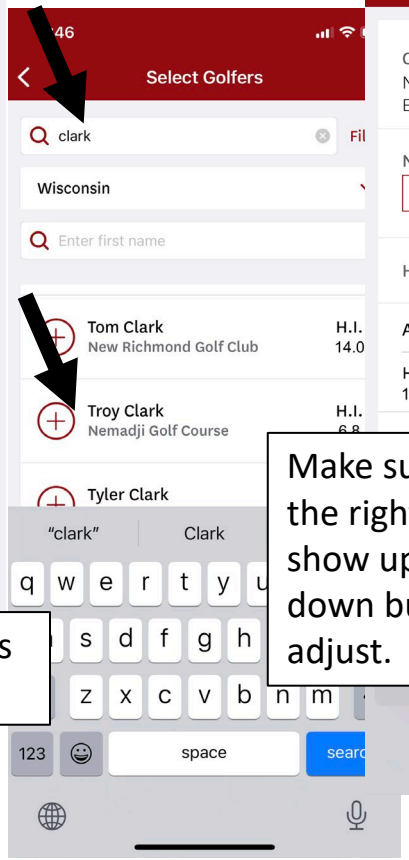
STEP 5 – FIND COURSE HANDICAPS

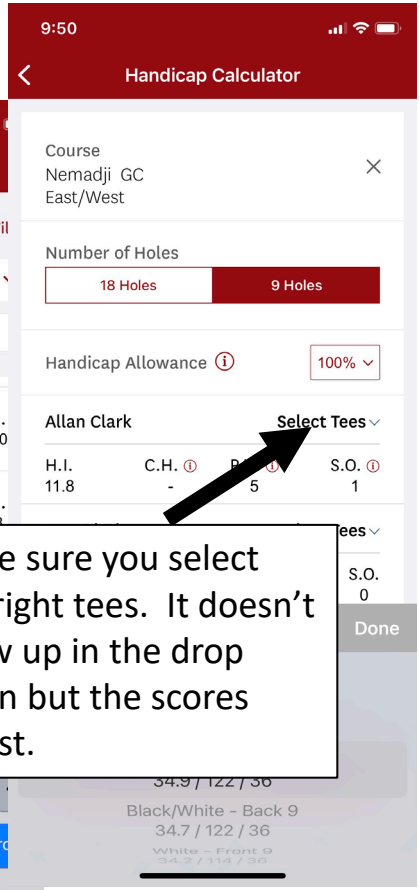






You can as many golfers as you'd like.





Make sure you select the right tees. It doesn't show up in the drop down but the scores adjust.

League Players Without Established Handicaps

If a player does not have a handicap calculated by the WSGA he will use a temporary handicap of his adjusted score (double bogey max) minus a 2 stroke penalty.

How are handicaps calculated before 20 rounds?

Number of *score differentials* in scoring record	*Score differential*(s) to be used in calculation of *Handicap Index*	Adjustment
3	Lowest 1	-2.0
4	Lowest 1	-1.0
5	Lowest 1	0
6	Average of lowest 2	-1.0
7 or 8	Average of lowest 2	0
9 to 11	Average of lowest 3	0
12 to 14	Average of lowest 4	0
15 or 16	Average of lowest 5	0
17 or 18	Average of lowest 6	0
19	Average of lowest 7	0
20	Average of lowest 8	0

Thank You!
